Herald Steam Printing House.
The HERALD Steam Printing House is not surprised by any job printing office on the Pacific Coast. We have the largest facilities for doing job work. Low prices, good work and execution may be relied upon at this office.

SPECIAL NOTICE.
Advertiser notices of companies, societies, churches, etc., will only be inserted in the HERALD as paid advertisements. We reserve for places of worship a gratuity directory which will appear every Saturday morning.

The HERALD Office is connected with the telephone system of Los Angeles city and telephone. Orders for advertisements or job work may be sent through this medium to number 16.

The HERALD is the official paper of the city of Los Angeles. The city's daily newspaper lists its municipal notices appear only in its columns.

Mr. R. N. Howe is the Santa Ana agent of the HERALD.

The Clamer Against Secretary Bayard.

Our esteemed contemporary, the San Francisco Chronicle, in an editorial article in its issue of last Thursday, contains a very savage thrust at Secretary Bayard. The peculiar brutality of the assault is the more noticeable because the distinguished head of Mr. Cleveland's Cabinet is suffering just now from a sudden and painful bereavement which has directed towards him the sympathy of the whole country, irrespective of party. The Chronicle's inventive is based upon an attack upon Secretary Bayard which appeared in an Eastern review. Great stress in both the review and the Chronicle is laid upon the alleged mistake of Mr. Bayard in appointing Mr. Kelley as Minister Plenipotentiary and Envoy Extraordinary to the Italian Court. We fail to see that any blunder was committed by Mr. Bayard in the premises.

The appointed was selected for this diplomatic post as a result of the Secretary's knowledge of his eminent fitness, and through the recommendations of the most illustrious citizens of the South, such men as Barbour, of Virginia, and citizens of that ilk. Mr. Kelley is one of the most accomplished of Americans, speaking three or four of the modern and several of the dead languages. He was thus especially well adapted to figure at the Court of Italy. Unfortunately, it happened that, some fourteen or fifteen years ago, he had made a speech bitterly attacking the methods by which King Victor Emanuel had obtained possession of the Papal States. Mr. Bayard had never heard of this speech and probably Mr. Kelley had forgotten all about it. Not so the Italian government. It promptly declined to receive Mr. Kelley; and the gentleman, with perfect propriety, and pursuant to precedent, was afterwards designated to the Court of Vienna. There was nothing unusual at any stage of this business except the refusal of the Venetian Court to receive Mr. Kelley after his rejection by the Italian Court. The case was exactly on all fours with that of Mr. Soule in President Pierce's administration. Mr. Soule was originally nominated as Minister to Spain, and the government of that country declined to receive him on the ground of his connection with the Ostend manifesto and his known partiality for the annexation of Cuba to the United States. Mr. Pierce immediately nominated Mr. Soule as Minister to France and Napoleon III raised no objection to the appointment.

The only thing peculiar in the whole matter has been the conduct of Austria. Under the circumstances, the administration of Mr. Cleveland has very properly left the mission vacant. The American people are entirely in union with Mr. Bayard in this matter. They heartily wish that all these missions should be abolished and the whole tribe of European popinjays diplomats left at home. They are out of place at the seat of a Republican government, and there is no hereditary monarchical necessity here for personal representatives abroad. Mr. Bayard's record in this matter reveals the old, wholesome Democratic traditions.

We have disposed of a specimen brick of the Chronicle's arraignment of Mr. Bayard. All the other charges are equally frivolous. Both the assaults of the Eastern reviewer and his San Francisco copyist are mere leather and prunella—more sound and fury signifying nothing.

MATOR SPENCE, at the meeting of the Board of Trade Monday evening, said that within a fraction of \$1,000 had been spent on the Los Angeles river after the flood of two years ago by the City Council, and that the expenditures did not go \$10 worth of good. The HERALD pointed this out at the time and labored unavailingly to stop the ridiculous misappropriation of the people's money. This large sum would come in very handy just now in aid of some reasonable plan of controlling the river for the future. What is really needed is to give the stream ample room and to build substantial levees on each bank. Occasion should be taken to so construct these as to admit of their conversion into handsome drives. They should be faced with masonry, they ought to be of sufficient height to effect their object and the river ought to be spanned by high bridges with wide arches. These structures ought to be built with a view to durability and not on the makeshift plan. If this is done there is no earthly reason for anxiety about the river for many years to come, and if its mouth is kept clear and not allowed to accumulate silts it will settle the matter for all time. We should then not only have security but drives of which we could justly be proud as well.

The HERALD acknowledges the receipt of a handsomely printed copy of the petition of the Los Angeles Board of Trade to Congress for appropriations for Wilmington Harbor, for a government building at Los Angeles and for the establishment of a United States District Court for the counties of Los Angeles, San Diego, San Bernardino, Ventura, Santa Barbara, San Luis Obispo and Kern. The petition contains a brief but cogent and logical presentation of the grounds upon which Congress is asked to grant these bounties.

The news reaches us that Gen. John M. Pope is about to be placed upon the retired list. It would have been a happy thing for the success of the Union arms if he had been retired before the bloody fiasco of the second battle of Bull Run, before he had made himself the prize of the war and had had an opportunity of making the soldierly and chivalrous Gen. Fitz-John Porter the scape-goat of his miserable incompetency.

Something About Postoffice Matters.

The system of Free Postal Delivery has not worked so well as might be expected in Los Angeles because it has not had a fair trial. To give it anything like a fair show there should be at least six more carriers. The fact ought to be steadily borne in mind that Los Angeles covers fully thirty-six square miles of ground. The great difficulty experienced by the Los Angeles people in getting due recognition from the authorities at Washington lies in the fact that the authorities at the Capital are too apt to keep their eyes upon the census of 1880, which gave this city a population rising very little upon the eleven thousand, while today there are probably thirty-seven thousand souls living within the limits of the pueblo. The business done at this post-office comes immediately after that of San Francisco in magnitude. During Christmas week just double the number of registered letters were received here that were received at the Oakland Post-office, although the Postmaster at the latter point is allowed three registry clerks by the Washington officials, while ours is allowed only one.

We are glad to learn that the department at Washington is about to issue orders for the carrying of the Eastern mails via Waterman. The official order for the change will be along in a few days. This will make a saving of seven hours in the arrival of letters and papers at Los Angeles from the East and of seventeen hours in their dispatch toward Atlantic points—a very sensible and grateful change, promotive of the comfort of both visiting and resident population.

We were in error in assuming the other day, that the John S. Wise, who made the brilliant speech in the House of Representatives in answer to Boutelle, was the gentleman of the same name who was beaten by Fitzhugh Lee for Governor of Virginia. The similarity of names misled us. They are near relatives, but the member of Congress is a good Democrat and never polluted himself by any association with Malone.

Wise a little encouragement the San Francisco and Sacramento newspapers will soon have extended the semi-tropical belt to the foot of Mt. Hood. When all the citrus belt of that prolific region shall have been exhausted it will be next in order to exploit Alaska for orange-growing territory. Speed the good work!

SILVER COINAGE.

Pro-Silver Arguments Presented to Hawley.

The following is extracted from the proceedings of the Bankers' Convention held in Chicago last fall:

Mr. James B. Colgate, the balloon dealer of New York, now asked to be heard. At the invitation of Mr. Gage, he assumed a platform and created a sensation by a paper in favor of the standardization of silver coins. He helped from the tone of the papers that had been read, and from the remarks which he made, that the bankers were unanimous in their desire that it be once again tried. The use of the dollar coin was a new growth of hair. The Arch found a new growth of hair. The Golden Age is prepared from California roots and herbs, with one exception which is the use of the dollar coin, and makes them better to undergo the wear and tear of the discharging function imposed upon them by nature. Moreover, as they are now, we have the use of certain coins from the West which increases their usefulness by strengthening and healthfully stimulating them. In certain bodily conditions of these metallic organs, they are the physicians which are the usual persons of disease. What we have to do is to get services than those which impresses them to greater activity when stolid? No man can be more modest than those which affect the kidneys, and a medicine which averts the peril, should be highly esteemed.

official could take all the capital of some bank and leave it on some Saturday night, and the chance of getting away in Canada would receive another penalty. But he would like to see a man do that with one thousand of the bland buzzard birds. He didn't do it. It would be good to know.

Suppose that gold payments were suspended, and that silver would draw six per cent, interest in the market, and the banks? It was at this time the highest prices of the day were made for inactive stocks. Later the market was seen two dogs fighting in the street and a half dozen dogs sitting on the curb wagging their tails?

No sir, the dogs are long, I am laughing.

Talk about keeping up your credit abroad! It used to be when a man had gone on a debauch, he was willing. Now he has been on a debauch the next morning he has the malaria. [Laughter.] About \$7,000,000,000 in gold, in round numbers, is the amount of the wealth of this country. It is more than \$70,000,000 a year. A great many of the members present were fathers. Yes, and they have neighbors who are sons. And the neighbors who had children, and those that had credit, which those children enjoyed. And what was the result? The fathers were on the road.

We are glad to learn that the department at Washington is about to issue orders for the carrying of the Eastern mails via Waterman. The official order for the change will be along in a few days. This will make a saving of seven hours in the arrival of letters and papers at Los Angeles from the East and of seventeen hours in their dispatch toward Atlantic points—a very sensible and grateful change, promotive of the comfort of both visiting and resident population.

New the gentlemen were frightened at a little silver. Look at the South, for instance. When the South had credit she earned \$10 and spent \$15. That ruined her. After the war she had no credit, but she had the best. She told me she had given to another Chinaman, who furnished a statement to the police here. Ang Tin Duck is the true name of the murderer.

The spudding of Southern resources showed what could be done without credit. Credit was a positive injury to the South. American credit abroad was a positive injury to this country. So long as this country allowed Europe, with its Germans, and its England, to run wild over us and the driving out of silver would finally drive this nation to poverty. Let us have cheap silver. It would not be bad, but it would not hurt us one bit. What credit would it give the government if it printed \$100,000,000 in gold and locked it up? The Chinese laundry.

CITY COUNCIL.

An Extended Session Yesterday.

A VALUABLE CITY OFFICE.

Colonel Walter S. Moore Elected Chief Engineer of the Paid Fire Department.

The City Council met yesterday afternoon at 1:30 o'clock, as a committee of the whole, to consider the S. P. R. E.'s demand for \$107 overpaid taxes. Councilman Perry occupied the chair. Major George S. Paxton appeared on behalf of the railroad and presented the matter in a clear and concise manner.

On motion, the matter was referred to a special committee, consisting of Morris, Perry, Jones and Kuhrt. The committee then arose and President Bischoff, taking the chair, called the Council to order. All members were in their places.

The minutes of the previous meeting were read and approved.

POLICEMEN APPOINTED.

The Police Commissioners recommended that it be voted that the services rendered by the police force during the late flood, a sum of \$50 be added to the salary of each officer of the regular force for the month of January. Christ Davis not accepting any extra compensation. Referred to the Committee on Finance.

THE COURSE ENGINEER.

W. S. Moore, Secretary of the Board of Fire Commissioners, reported to the Council that the Board had organized and requested the Council to elect a Chief Engineer of the Fire Department.

The communication was received and the election of a Chief Engineer, in accordance with Councilman Kuhrt's nomination George P. McLain, was added to the salary of each officer of the regular force for the month of January. Christ Davis not accepting any extra compensation. Referred to the Committee on Finance.

The Superintendent of Streets presented his weekly pay roll amounting to \$237.74. Same reference.

The Zanjero presented a pay roll amounting to \$12. Referred to the Finance Committee.

The Superintendent of Streets presented a weekly pay roll amounting to \$237.74. Same reference.

The Zanjero reported that the ditches and dams are in a deteriorated condition. The main supply dam about a mile from the city has given way, necessitating the making of a new ditch and tapping the river higher up. The dam of the Zaaja Madre is all gone. It is believed an old one has given way, and the river having cut very deep, and the sand gates are all gone. There is about 400 feet of the dam on which no. 2 was made, and what will have to be done is to have a new one made, saving a large part of the lumber. The reservoirs are all right. I would ask for instructions. Referred to the Committee on Finance.

The City Tax Collector presented his report of the condition of the several funds of the city. Referred to the Finance Committee.

The Superintendent of Streets presented a weekly pay roll amounting to \$237.74. Same reference.

The Zanjero presented a pay roll amounting to \$12. Referred to the Finance Committee.

The Superintendent of Streets presented a weekly pay roll amounting to \$237.74. Same reference.

The City Board of Education reported the collection during December of \$12,394.32, and the expenditure of \$12,242.84, leaving a credit of \$122.66 to the Board. Referred to the Committee on Finance.

The City Treasurer presented a report of the funds, etc., collected by City Justices during the year 1885, amounting to \$117.30. Filed.

Mr. V. Beaudry presented a report of the working of the Los Angeles Water Works for the year 1885. Consumption \$65,990; bills, \$16,405; expenses, \$21,913.85; improvements, \$10,096.35; first cost of system, \$83,026.25; improvement in 1884, \$10,167.61; in 1885, \$10,096.35; total consumption, \$102,000. Bills, \$11,667.61; expenses, \$21,913.85; first cost of system, \$83,026.25. Referred to the Committee on Finance.
